London, UK

Dynamic ERP Implementation Consultant with 27 years of transformative experience across global leaders like Shell, Morgan Stanley, NHS, UKAEA, and Alzheimer's Society.

Specializing in Unit4, SAP, and Oracle ERP implementations, I drive end-to-end solutions, from solution design and data migration to testing and go-live, delivering measurable impact such as accelerating financial reporting by 55% and slashing HR processing errors by 32% through SQL scripts and REST APIs.

Certified in SQL/ARC, proficient in JSON and JavaScript for website design, and skilled in Internet Marketing (HTML, SEO), I blend technical expertise with strategic innovation to pioneer projects like the Alzheimer's Society's real-time grant tracking module.

Passionate and analytical, I thrive on complex challenges, consistently exceeding expectations to deliver exceptional value for industry leaders.

Experience

Quantitative Trading Systems Developer/ Financial Algorithm Engineer

Sep 2023 - Present
London (UK), Cairo (Egypt), Dubai (UEA), Bangkok (Thailand)

- Architected and deployed a comprehensive set of sophisticated Technical Analysis tools, trading strategies, and performance metrics, coded in Python and Pine Script, exclusively for High-Net-Worth Individuals requiring strict anonymity.
- Engineered bespoke indicators and automated trading algorithms tailored to client-specific financial goals, leveraging advanced data processing, statistical modelling, and real-time market data integration.
- Enhanced strategy performance through rigorous back testing, optimization, and risk management protocols, delivering highly accurate, actionable insights.
- Ensured seamless execution and confidentiality by implementing secure, scalable solutions, enabling clients to make informed investment decisions with confidence in dynamic financial market conditions

ERP Implementation Consultant – R2R/Project Management

Alzheimer's Society

Mar 2023 – July 2023
London, UK

- Re-Implementing ERPx

- Assisting all project team with knowledge share about Unit4 ERPx and how it all works
- Designing and configuring Workflow maps and rules
- Implementation of Single client, with 3 entities, using Cat7
- Design if Reports within ERPx to match Stakeholder's Requirements

ERP (HRP/RES) Implementation Consultant ERP

Unit4
Feb 2022 - Feb 2023
Remote working
London - UK

- Become advanced user of Unit4 functionality "FXFILL - Auto Pop", and applied it to various HR forms build for ROC
- Various years of SQL experience were used a lot in Auto-pop functionality.
- JSON code used to create various Service Calls to write back to ERP system
- All HR processes are built using over 24 forms, where these forms pretty much dictate all HR functionality for ROC
- Build over 12 forms, and assisted fixing SQL with other ones

- Assisted Payroll in fixing a lot of Payroll sections, within the forms, with various auto-calculated fields, which needed various complex SQL scripts, to complete these tasks
- Fix errors with IST1 phase
- Help prepare new environment/copy for IST2 phase
- Regular weekly calls with customer ROC, to discuss flaws with design/build, and different solutions to accommodate proper function of forms and HR processes
- Regular bi-weekly calls to discuss Payroll calculated fields and enhance them to accommodate customer expected outcome

Skills: Forms · web form · SQL · JSON · Service Call · Web Services API

ERP Consultant
WebBeds
Dec 2018 – Feb 2022
London – Palma de Majorca (alternate between 2 locations)

- Brought in to fix loads of errors & issues with their implementation of Unit4 ERP Milestone 6 – Update 4, of Financials module & Logistics module, in their Office in Palma de Majorca.
- Resolved major issues & errors arisen from the Data Migration.
- Development of various Excelerator reports in SQL (RESQL) to accommodate to the way ERP was initially designed & implemented.
- Assisted full AR reconciliation by Cat2 (Booking_id)
- Administration of UNIT4 ERP Interface with Booking systems (Hotel Maker; Maker), using Logistics (LG04)
- Re-designed the whole Bank Reconciliation configuration & process within ERP system Developed different versions of Aged Debtors Report, in SQL, via Excelerator Deployed Year End in PROD, as never been completed before my arrival.
- Various enhancements on the customization of AR Statements processing (SHT003) – Re-design SQL code behind it
- Deployed Currency revaluation in Production Environment Re-designed the Master Template for GL Journal Post back
- Re-configuration of all User accounts, Role ids and respective access rights

ERP Consultant
WSP
Sep 2018 - Nov 2018 (3 months)
Leeds - UK

- Brought in to assist in improving month end processes for Finance & Payroll & any other improvements deemed required
- Working on Milestone 6, Update 2
- Helped design a GL07 Batch Input journal template, that helps users identify “anticipated” fails when loading in BW, to stop various occurrences of errors, and various IT tickets logged by users
- Analyzed all triggers configured in BW, and due to various errors in postings, corrections, etc…, created a “Master File” where all info sits, for all P&Ds that require to have triggers setup. Then going forward, users only need to update file, and

should be very quick for IT to update current Triggers Master File

- Designed a new process for closing Cost Centers. This is due to the major importance this attribute has on posting and reporting in the business. This includes designing a new form, workflow process, various browser reports and SQL scripts to be run for dependencies, including store procedures.
- Solved issue with Finance having over 237K rows of zero postings in GL from Timesheets. Offered solution to remove configuration of ORR rates from PCB and adjust all relevant dependencies so these postings never occur again
- Any other had-hoc by the business when my expertise is required.

ERP Consultant

Embridge Consulting

Feb 2017 - May 2018 (1 year 4 months)
